THE SIXTY-EIGHTH REPORT OF THE REGISTRAR-GENERAL ON THE VITAL STATISTICS FOR THE STATE OF QUEENSLAND FOR THE YEAR 1927.

In presenting this Report, the following outstanding points are worthy of special mention:—

Population.—The net increase to the population of the State during the year was 1·93 per cent., compared to 3·58 in Western Australia, 2·24 in New South Wales, 1·73 in Victoria, 1·66 in South Australia, 1·47 in New Zealand, and 0·52 in Tasmania. Natural increase was responsible for 69·19 per cent. of the increase, and excess immigration over emigration for 30·81. Queensland now contains 14·42 per cent. of the total population of Australia; males are still in the majority to the extent of 100 males to 89·24 females.

Marriages.—The marriage rate per 1,000 of mean population (7·04) was a further decrease on the previous year (7·34), and with the exception of 1918 (7·00) is the lowest recorded since 1906 (6·73). The respective rates in the Australian States in 1927 were—New South Wales 8·45, Western Australia 8·07, Victoria 7·88, South Australia 7·88, Queensland 7·04, and Tasmania 6·82. New Zealand rate was 7·63. The mean age at marriage of all husbands was 28·98, and of all wives 25·02.

Births.—The birth rate per 1,000 of population is the lowest on record, there having been a gradual decline since 1917. Similar decreases in recent years are common to all Australian States. Tasmania, with 23·01, had the highest rate, followed by New South Wales, 22·69, Queensland 22·23, Western Australia 22·03, Victoria 20·30, New Zealand 20·28, and South Australia 20·12.

Deaths.—The death rate (9·06) shows a slight improvement on that for 1926 (9·39), and is the lowest since 1857, with the exception of 1924 (8·88), and 1925 (8·86). South Australia, Western Australia, and New Zealand had slightly lower rates, and New South Wales, Victoria, and Tasmania higher.

The principal causes of death, if we omit senility, were—Heart diseases, which caused 1,116 deaths, providing a rate of 125 per 100,000 of population, Cancer (all kinds) 731, or a rate of 82, and Nephritis (Acute and Chronic) 501, or a rate of 56.

A recent investigation shows that the deaths from Chronic Nephritis in Queensland in persons (especially females) aged ten to forty years, compared to other Australian States, is very high, as the following will show:—

Deaths from Chronic Nephritis during period 1917–1926 per 100,000 of population (1921 Census)—(10–40 years).

	Males.	Females.
Queensland	271	376
New South Wales	100	104
Victoria	95	120
South Australia	104	89

The infantile mortality rate shows an increase of 0·41 per 100 births on the previous year, and is the highest since 1920.

NOTE.—The amount actually realised bears but a small proportion to the amount sought to be recovered; but it must be borne in mind that in many cases the defendant, on a levy being made, becomes insolvent, and any property seized passes to the Official Trustee for the benefit of the Creditors, and consequently no sale by the Sheriff takes place. Many also of these writs of *fieri facias* were for large amounts, the suitors holding mortgages over and being in possession of the property seized, and were merely lodged for the purpose of obtaining the Sheriff's title for the conveyance of the interest, the purchase money being nominal.
